

# Tx300P Series × Unique Hybrid Printer

TP400

Hybrid

Sb420

## Textile pigment ink TP400

Recommended for products such as home-furnishing made of cotton, hemp materials.

## Sublimation dye ink Sb420

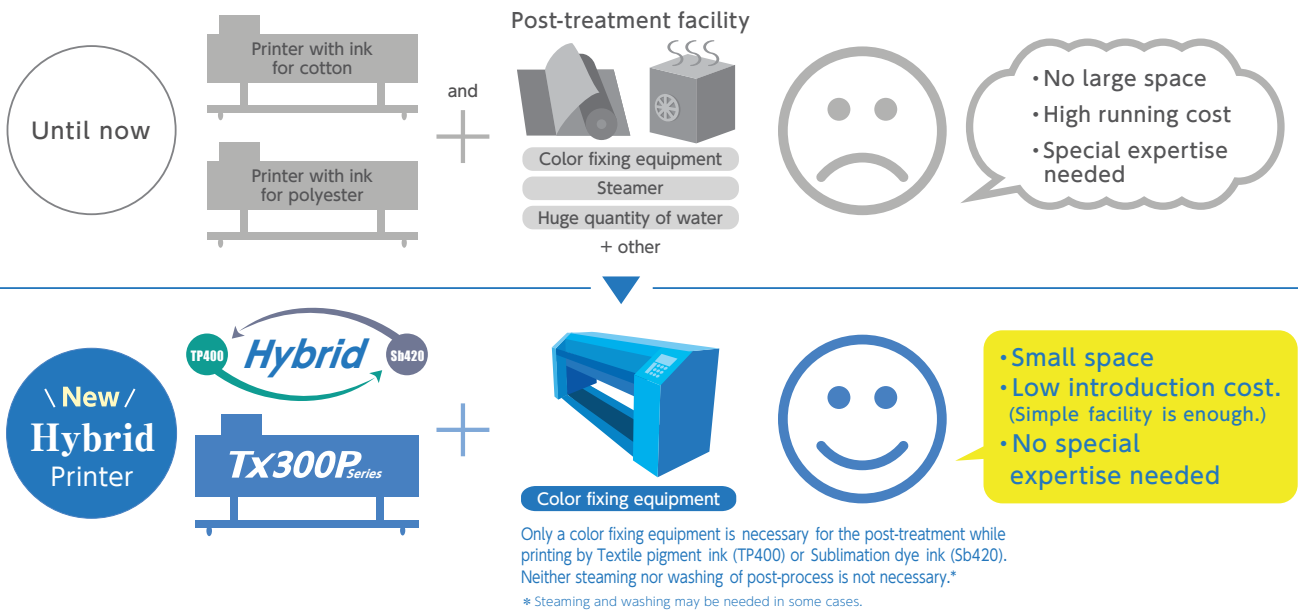

Recommended for products such as soft-signage, apparel made of polyester material.

## One printer, two inks to print on cotton and polyester!

In normal course of operation for textile printing, one ink per printer must be selected. The Hybrid Printer will enable textile producers to simultaneously load TP400 textile pigment ink for cotton and hemp materials as well as Sb420 sublimation dye ink for polyester material.

— Printing on cotton and polyester in case of design, quick deliveries and short, customised environments —

### Initial cost reduction & Space saving

One printer for cotton and polyester, two inks! With one printer and one color fixing equipment a big investment for post-treatment process facility is not required.

### No special expertise

As post-treatment is not needed\*, no special expertise is required and is easy to start printing.

\* Steaming and washing may be needed in some cases.

# Unique Hybrid Printer for flexible textile printing

A new technology that makes possible printing on cotton, hemp and polyester with one printer.

Fast and simple for test and samples. Specific customer proposals are easier.

Efficient for quick deliveries and short production.

## Textile pigment ink TP400

These inks, which consist of solvent, pigment and binder agent, are fixed through heat without impairing the breathability and water absorbency of the fabric. The result printing on cotton and hemp materials is beautiful and is recommended for interior fabrics, T-shirts and various other apparel applications.

Textile pigment ink color fixing method

## Sublimation dye ink Sb420

Sublimation dye inks are specifically designed for use with pre-treated fabrics, especially polyester. The color is fixed using heat after printing. These inks are ideally suited for those applications that required good color and excellent color reproducibility, which can convince even the most fashion designer.
